ABSTRACT

This software product is designed to teach punctuation to students aged 8 to 14 years. The software may be used without the printed text, but educators will appreciate the added dimension and greater convenience that the lesson plans provide. Along with the 12 lesson plans are worksheets, templates, and other materials needed to complete the activities. Teachers are encouraged to adapt the lesson plans to meet their particular teaching needs. Each of the lesson plans includes activities, an area of focus, a description of the method used, the goals and objectives, the materials required, the area of emphasis and several variations. (RS)
